Mission Report

Horizons Project

RMHS in a Post-Covid World

Our Approach

- Representatives of cross-functional groups
- Brainstormed challenges, opportunities, and gaps
- Evaluated changes in needs of our clients, service delivery models, and funding
- Laser focused on our mission
- Kept our eyes on the big picture, knowing that another phase of the project would operationalize and develop implementation plan

Ideas Emerged in These Areas

- New programs that fit our mission and our clients' needs and expansion or revisioning of existing programs to address changing needs
- Enhanced resource coordination and community partnerships
- Expansion of telehealth/telemedicine
- Ongoing needs assessment and measurement and evaluation of outcomes

Value Metrics to be Considered for Decision Making

- **Need**. Meets a need that has emerged or been revealed by the current situation.
- Value. Efficient use of resources; "most bang for the buck".
- **Funding Can Support**. Either there is an existing identifiable funding source, or the recommendation aligns with known or perceived priorities of funding agencies and grantors.
- **Future Oriented**. Considers the future landscape so that we are developing models that will still be applicable several years from now.
- **Feasibility**. Something that we can actually accomplish.
- **Alignment**. Fits with our mission, values, and designed with input from stakeholders: staff, BOD, clients, community partners.

Next Steps

We are compiling the recommendations into an easily digestible format.

We will provide the opportunity for Leadership Team and the BOD to assist in prioritizing which we will pursue.

We will convene implementation teams to launch our efforts.
